REMARKS / DISCUSSION OF ISSUES

Claims 1 and 3-6 are pending in the application. Claims 3 and 6 are allowed.

The final Office action withdraws the 35 USC § 112 and the 35 USC § 102 and 35 USC § 103 rejections over the cited references. Applicant thanks the Examiner for this indication of patentable subject matter.

The final Office action objects to the disclosure, requiring that in the various formulae " $0 \leq z < 1$ " in the specification be replaced by $0 < z < 1$. Applicants respectfully disagree with the necessity for this change, however the specification is amended as required because the matter is considered *de minimis* and a person of ordinary skill in the art will understand what is meant in either case. Accordingly, withdrawal of the objection to the disclosure is respectfully requested.

The final Office action rejects claim 2 under 37 CFR 1.75(c) as duplicative of claim 1 because the term "intrinsically pigmented" of claim 1 is defined in the specification using the language of claim 2. Accordingly, claim 2 is canceled without prejudice or disclaimer of its subject matter.

The final Office action rejects claims 1, 2, 4, and 5 under the obviousness-type double-patenting doctrine over U.S. Pat. No. 6,462,473. In response, applicants submit a Terminal Disclaimer to obviate this rejection. Accordingly, withdrawal of the double-patenting rejection of claims 1, 2, 4, and 5 is respectfully requested.

All matters with respect to patentability have now been resolved. Accordingly, applicant(s) respectfully request(s) that the Examiner withdraw the rejections of record, allow all the pending claims, and find the application to be in condition for
